Improving Neighborhood Access Across 1-37 (Houston St. to Carolina St.) (RFQ#: 2024-185)

I. Background

The City of San Antonio (City), Transportation is issuing a Request for Qualifications (RFQ) seeking Statement of Qualifications (SOQ) from interested professional consultant firms (Respondents) for the study and preliminary design of the project known as Improving Neighborhood Access Across 1-37 (Houston St. to Carolina St.) (Project).

The USDOT Neighborhood Access and Equity (NAE) Planning Grant aims to improve walkability, safety, and affordable transportation access through context-sensitive strategies, and address existing transportation facilities that create barriers to community connectivity or negative impacts on the human or natural environment, especially in disadvantaged or underserved communities. Awarded to the City of San Antonio in 2024, the NAE will assess the feasibility of design solutions to mitigate Interstate Highway 37 (between Houston Street and Carolina Street) to reconnect the Eastside with Downtown and Hemisfair.

The City seeks a qualified consultant to facilitate community engagement, assess existing conditions, develop alternative concepts, and analyze feasibility.

The contract duration is throughout the project completion (Estimated June 2026) and is not-to-exceed the contract value of approximately \$3.7 million.

II. Scope Of Work and General Requirements

History

The Eastside is a diverse community with a rich cultural heritage and a history of displacement. Before the 1900s, the area was home to the city's largest concentration of African American residents, including minority-owned businesses and a thriving arts and music scene. The Eastside's dense and interconnected street network links historic streetcar neighborhoods, employment areas, and amenities, supporting local quality of life. Early development of blocks and roads between the 1890s and 1940s reflected a time when more shopping, recreation, and work occurred closer to home, often without the use of a car. The transportation system emphasized the streetcar network and neighborhood connections to the local streetcar network and downtown, although the area also included roads that connected San Antonio with communities to the east.

In the 1930s, the area was redlined, the first step in isolating majority-minority communities. The construction of I-37 in the 1960s physically segregated the Eastside from Downtown, as local streets that once connected neighborhoods with destinations were severed by a new limited-access facility.

Existing Conditions

Today, I-37 has four main lanes in each direction. Within the study area, pedestrians have three options for crossing I-37: 1) an isolated and uninviting crossing under I-37 at Montana Street, 2) a poorly lit crossing over Montana Street but under I-37 that is hard to reach for Eastside residents and provides circuitous access between the Alamodome and the Tower of the Americas, and 3) a poorly lit and uninviting crossing under I-37 at Cesar E. Chavez Boulevard. Additionally, there are no sidewalks east of I-37 on the northbound frontage road from Cesar E. Chavez Boulevard to Montana Street. I-37 was constructed on berms, creating both a physical and visual barrier and making each of these crossings feel cavernous and isolated.

According to the SA Tomorrow Eastside Community Area Plan, the area has the lowest number of vehicles owned per capita in San Antonio, and with some of the lowest per capita household incomes in the city, area residents on average have the least capacity to afford car ownership. Today, an average of 83 percent of Eastside residents are ethnic minorities, and approximately half are low-income, much higher than the regional average of 20 percent.

SA Tomorrow Plan

The SA Tomorrow Downtown Area Regional Center Plan, adopted in December 2019, recommended developing stronger connections to character-defining features and other areas outside the Downtown core by addressing barriers created by major infrastructure.

Some of the I-37 accessibility burdens identified through extensive public involvement in the Downtown Regional Center Plan include:

- Dark and uninviting spaces in underpasses.
- Obstructed views due to construction on berms.
- Safety concerns for people walking and biking across and along I-37.
- Unwelcoming environment of fast speeds.
- Need for improved crossings of I-37 and Commerce Street, Cesar Chavez Boulevard, Caroline Street, and Florida Street.

Purpose

The City of San Antonio was awarded a planning grant through the USDOT Neighborhood Access and Equity (NAE) program. The NAE grant will fund a Study on how to better connect Downtown San Antonio to the historically underserved Eastside community. The objective of this solicitation is to identify a qualified consultant to conduct community engagement, evaluate existing conditions, and develop and analyze solutions to reconnect neighborhoods and destinations across I-37. The study will result in a feasible, community-driven plan which:

- Reconnects neighborhoods through accessible pedestrian and bicycle infrastructure improvements and public space, in accordance with the SA Tomorrow Downtown Regional Center Plan.
- Reduces or eliminates safety conflicts between vehicles, people on bikes, and people on foot when crossing I-37.
- Creates outcomes that reduce or eliminate existing inequities and advance accessibility and inclusion.
- Connects the Eastside to destinations such as the Convention Center and Hemisfair in a seamless urban experience with a strong, district-specific brand identity.
- Mitigates the environmental impacts of I-37 including air, water, and noise pollution and the urban heat island effect in accordance with the SA Climate Action Plan.
- Supports and complements the long-term safety and functionality of I-37 as the primary north-south connection through the city, region, and state.

In achieving these objectives, the study will integrate with other ongoing and emerging work efforts, such as the proposed Tower Park improvements in Hemisfair. Consultant will be required to coordinate with related urban design and transportation planning initiatives by the City and State as they may evolve over time.

Public Engagement and Outreach

Consultant will develop and undertake a Community Participation Plan that meaningfully engages community stakeholders to develop a vision for reconnecting the Eastside to Downtown. The Community Participation Plan will be coordinated with Council District 2 and shall include but not be limited to: multilingual communications, online and intercept surveys, one-on-one stakeholder interviews to include area neighborhood associations, presentations to existing groups and organizations, public workshops, a design charrette, door-to-door outreach to low-income and minority stakeholders, and outreach at community events. Engagement efforts should consider and overcome barriers to participation, such as access to childcare or transportation. The Community Participation Plan should also be informed by U.S. Department of Transportation's (USDOT) Promising Practices for Meaningful Public Involvement in Transportation Decision-Making.

Existing Conditions

The focus area for this project runs along Interstate Highway 37 from Houston Street to Carolina Street, with Downtown to the west and the Eastside to the east. Today, I-37 and the parallel Union Pacific Railroad create physical obstacles with a significant footprint and high-speed traffic. While I-37 is adjacent to publicly owned amenities including the Henry B. Gonzalez Convention Center, Hemisfair, the Tower of the Americas, and the Alamodome, direct community access to and from the Eastside is hindered by the highway.

The Consultant will assess existing conditions to understand how the current infrastructure supports people traversing the focus area on foot, on bike, or other methods without an automobile.

Alternative Concepts

Based on community vision and existing conditions, Consultant will prepare several alternative concepts to enhance neighborhood connectivity through infrastructure improvements in the focus area. One alternative concept should consider a deck park connecting Hemisfair to the near Eastside and Alamodome over I-37. Other alternative concepts will show increased connectivity that prioritizes the safety and comfort of pedestrians, without a deck park over the highway. All concepts should expand green space for activation and use by the community and major events.

Alternatives Evaluation

Consultant will evaluate feasibility of each concept, to include preliminary design, engineering, and cost. The study should culminate with a preferred concept to be used in pursuit of construction grants, and a phased implementation strategy which allows the first phase to advance into design and construction within 1 year.

An Equity Assessment which examines demographics, income, educational attainment, health indicators, housing, digital inclusion, and mobility will be conducted for each alternative proposed.

Anticipated Deliverables

Consultant will provide a final report and executive summary presentation that summarizes the findings from the public outreach, existing conditions, and most relevant concept alternatives. Generally, information should be presented with text and graphics understandable to both the general public and professionals. Graphics should include tables, charts, and maps, as well as basic 3-dimensional representations of concept alternatives and massing. Additionally, graphics and other information should depict changes in modal networks, travel patterns, etc. Visualizations should be accessible to a diverse audience and be useable as an outreach and engagement tool in future phases.

Oversight and Budget

The City will appoint a subcommittee that includes representatives from the Hemisfair Park Area Redevelopment Corporation (HPARC), neighborhood association leadership from the four neighborhoods represented in the study area, as well as economic development corporations and foundations that work in the study area. The subcommittee will also include leadership from anchor tenants and the primary landowners: the City, Texas Department of Transportation (TxDOT), University of Texas at San Antonio (UTSA), and VIA Metropolitan Transit (VIA).
