CITY OF SAN ANTONIO INTERDEPARTMENTAL MEMORANDUMONSENT AGENDA PUBLIC WORKS DEPARTMENT TEN NO. 13

TO: Mayor and City Council

FROM: Thomas G. Wendorf, P.E., Director of Public Works

THROUGH: Terry M. Brechtel, City Manager

COPIES: Melissa Byrne Vossmer; Andrew Martin; Louis A. Lendman; Milo D. Nitschke;

Dan Cardenas; File

SUBJECT: Evergreen Street from McCullough Ave. to E. Euclid Ave. and

Evergreen Court from Evergreen Street to N. St. Mary's

DATE: September 18, 2003

SUMMARY AND RECOMMENDATIONS

This ordinance authorizes payment in the total amount of \$9,712 to Pape Dawson Engineers, Inc., a non-MBE firm, for environmental consulting services associated with the Evergreen Street from McCullough Ave. to E. Euclid Ave. and Evergreen Court from Evergreen Street to N. St. Mary's project, an authorized Community Development Block Grant (CDBG) project, located in Council District 1. A previously executed On-Call Professional Services Agreement in an amount not to exceed \$180,000 for Non-Asbestos Environmental Engineering Services with Pape Dawson Engineers, Inc. was approved by City Council on February 28, 2002 through Ordinance No. 95384. As of September 1, 2003, \$9,988.82 has been expended for services provided under this Agreement.

Staff recommends approval of this ordinance.

BACKGROUND INFORMATION

This ordinance approves work under an existing professional services contract with Pape Dawson Engineers, Inc. for environmental services to provide a Phase II subsurface investigation and a subsequent follow-up of subsurface investigation. The Phase II subsurface investigation was conducted to identify the presence of impacted media along the project limits.

Due to impacted media identified in the initial investigation, a subsequent investigation was conducted to delineate the vertical and horizontal extent of the impacted media. The subsequent investigation is currently underway at the time of this ordinance. Results of this investigation will determine specific health and safety measures and waste management procedures required during construction.

The Evergreen Street from McCullough Ave. to E. Euclid Ave. and Evergreen Court from Evergreen Street to N. St. Mary's project includes the reconstruction to a street width of 30 feet, curbs, sidewalks, driveway approaches, and necessary drainage. This project is currently in the design phase and is scheduled to advertise for bids in September 2003, begin construction in December 2003, and be completed by December 2004.

POLICY ANALYSIS

Approval of this ordinance will be a continuation of City Council policy to complete previously approved CDBG funded Capital Improvement Projects. Environmental investigation is a necessary component of the design of Capital Improvement Projects.

FISCAL IMPACT

This is a one-time capital improvement expenditure within budget and included in the FY 03-08 Capital Improvement Program Budget. Funds in the amount of \$9,712 are available from CDBG funds and authorized payable to Pape Dawson Engineers, Inc.

COORDINATION

This request for ordinance has been coordinated with the Office of Management and Budget, the Finance Department, the Housing and Community Development Department, and the Environmental Services Department.

SUPPLEMENTARY COMMENTS

The Discretionary Contracts Disclosure Form required by the Ethics Ordinance is attached.

Re:

Evergreen Street and McCullough Avenue

Phase II Environmental Site Assessment Proposal

Dear Mr. Espinosa:

Pape-Dawson Engineers, Inc. is pleased to present this proposal to perform a Phase II Environmental Site Assessment (ESA) at the referenced site. A Phase I ESA performed by the City of San Antonio Environmental Management Division (EMD) recommended soil sampling near the Little Taco Factory (former service station) located at 1502 McCullough Avenue. Three (3) borings are proposed adjacent to the former service station in city owned right-of-way. The proposed depth for the borings is 15-feet. Based on previous project experience with the City of San Antonio (COSA), the following scope of services is proposed:

- Select and agree to boring locations with COSA Environmental staff
- Coordinate with public utility companies to have public utilities located
- Obtain street cut permit from City of San Antonio
- Coordinate traffic control and erect signage. Two right-hand lane closures may be necessary.
- Observe probing of borings, log samples, and collect samples for laboratory analyses
- Direct push probing techniques will be utilized
- Collect groundwater sample in open boring if sufficient groundwater is encountered at the time of probing
- Analyze three soil samples per boring for TPH and BTEX. After review of analytical results by EMD staff, one total lead and one TCLP lead analysis may be performed.
- Analyze one groundwater sample for TPH and BTEX. The sample analyzed will be selected based on boring location and field observations.
- Soil cuttings will be containerized in 55-gallon drums and transported by the drilling contractor to a local staging area selected by the City. Authorization for disposal will be acquired from a local landfill and the waste will be disposed. This assumes that the waste is Class I or II non hazardous. Characterization, authorization, and disposal of hazardous waste is not included in this proposal.

PAPE-DAWSON ENGINEERS, INC.

Mr. Robert P. Espinosa, CEA Evergreen Street and McCullough Avenue July 28, 2003 Page 2 of 2

• Prepare a letter report describing field activities, observations, results, and recommendations

Based on the scope-of-services described above, Pape-Dawson estimates the cost to be approximately \$9,712. If this proposal meets with your approval, please acknowledge such by signing this proposal letter and returning one original to our office for our records. Receipt of the executed document will serve as your authorization for us to proceed with the work.

Sincerely, Pape-Dawson Engineets, Inc.	City of San Antonio Environmental Services Department
