The Architect may authorize minor changes in the Work not involving an adjustment in Contract Sum or an extension of the Contract Time which are consistent with the intent of the Contract Documents by issuing an Architect's Supplemental Instruction (ASI).

The Architect shall review properly prepared, timely requests by the Client or Contractor for Changes in the Work, including adjustments to the Contract Sum and/or Contract Time. A properly prepared request for a Change in the Work shall be accompanied by sufficient supporting data and information to permit the Architect to make a reasonable determination without extensive investigation or preparation of additional drawings or specifications. If the Architect determines that requested Changes in the Work are not materially different from the requirements of the Contract Documents, the Architect may issue an ASI and recommend to the Client that the requested change be denied. If the Architect determines that implementation of the requested change would result in a material change to the Contract that may cause an adjustment in the Contract Time or Contract Sum, the Architect shall make a recommendation to the Client, who may authorize a Change Order to be prepared.

Should preparation of Change Orders or Construction Change Directives require extensive evaluation of Contractor proposals and/or revisions or additions to the Construction Documents not occasioned by an error or omission of the Architect, such services shall be provided by the Architect as a Change in Services. The Architect will review and take appropriate action on Contractor's proposed substitution of materials or products, where such substitutions are permitted by the Contract Documents.

If the Architect is required to review more than one (1) request for substitution of any material or product or if the Architect is required to review any substitution requested when such substitution is not permitted by the Contract Documents, such review shall be provided by the Architect as a Change in Services.

required by the Contract Documents and assembled by the Contractor, and shall issue a final Certificate for Payment based upon a final inspection indicating the Work complies with the requirements of the Contract Documents.

The Architect's Substantial Completion inspection shall be conducted to check conformance of the Work with the requirements of the Contract Documents and to prepare a list of items to be corrected or completed. The Architect shall distribute copies of the list of items to be corrected or completed to the Client and Contractor.

When the Work is found to be substantially complete, the Architect shall inform the Client about the balance of the Contract Sum remaining to be paid the Contractor, including any amounts needed to pay for final completion or correction of the Work. When the Architect receives the Contractor's final application for payment, indicating the Final Completion of the Work, the Architect shall conduct a Final Completion inspection. The Architect's Final Completion inspection shall be conducted to determine the Contractor's satisfactory completion of the list of items to be corrected or completed. When the work is found to be finally complete, the Architect shall certify and forward to the Client the Contractor's final application for payment.

The Architect shall receive from the Contractor and forward to the Client: (1) consent of surety or sureties, if any, to reduction in or partial release of retainage or the making of final payment and (2) affidavits, receipts, releases and waivers of liens or bonds indemnifying the Client against liens.

Should the Architect be required to make more than one (1) inspection for Substantial Completion and/or more than one (1) inspection for Final Completion, such services shall be provided by the Architect as a Change in Services.

VI. CONSTRUCTION COST AND SCHEDULING SERVICES

OPINIONS OF PROBABLE CONSTRUCTION COST

When the Project requirements have been sufficiently identified, the Architect shall prepare a preliminary Opinion of Probable Construction Cost. This Opinion may be based on current area, volume or similar conceptual estimating techniques. As the

design process progresses through the end of the preparation of Construction Documents, the Architect shall update and refine the preliminary Opinion of Probable

Construction Cost. The Architect shall advise the Client of any adjustments to previous Opinions of Probable Construction Cost indicated by changes in Project requirements or general market conditions. If at any time the Architect's Opinion of Probable Construction Cost exceeds the Client's budget, the Architect shall make appropriate recommendations to the Client to adjust the Project's size, quality, or budget, and the Client shall cooperate with the Architect in making such adjustments.

The preliminary Opinion of Probable Construction Cost and updated Opinions of Probable Construction Cost prepared by the Architect represent the Architect's judgment as a design professional familiar with the construction industry. It is recognized, however, that neither the Architect nor the Client has control over the cost of labor, materials or equipment, over the Contractor's methods of determining bid prices, or over competitive bidding, market or negotiating conditions. Accordingly, the Architect cannot and does not warrant or represent that bids or negotiated prices will not vary from the Client's budget for the Project or from any Opinion of Probable Construction Cost prepared or agreed by the Architect.

If the Architect's final Opinion of Probable Construction Cost is exceeded by the lowest bona fide bid or negotiated proposal, the Client shall:

- give approval for an increase in the budget for the Cost of the Work;
- authorize re-bidding or re-negotiating of the Project within a reasonable time;
- terminate in accordance with the Client-Architect agreement, or;
- cooperate in revising the Project scope and quality as required to reduce the Cost of the Work.

If the Client chooses to proceed with revising the Project scope and quality, the Architect shall modify the documents for which the Architect is responsible under this Agreement as reasonably necessary to comply with the budget for the Cost of the Work. The modification of such documents shall be the limit of the Architect's responsibility.

If the lowest bona fide bid or negotiated proposal exceeds the Architect's final opinion of probable construction cost by more than fifteen per cent (15%), the Architect's services for modifying the documents shall be provided at no additional cost to the Client. **If the lowest bona fide bid or negotiated proposal is within fifteen per cent (15%) or less of the Architect's final Opinion of Probable Construction Cost, the Architect's services for modifying the documents shall be provided at as a Change in Services.**

The Architect shall be entitled to compensation in accordance with this Agreement for all services performed whether or not construction is commenced.

PROJECT SCHEDULE

When Project requirements have been sufficiently identified, the Architect shall prepare, and periodically update, a Project Schedule that shall identify milestone dates for decisions required of the Client, design services furnished by the Architect, completion of documentation provided by the Architect, commencement of construction and Substantial Completion of the Work.

VII. POST CONSTRUCTION SERVICES

RECORD DRAWINGS

The Architect shall prepare a set of reproducible record drawings of the Project, incorporating changes in the work and other significant variations in the built Project from that depicted in the Construction Documents.
